

1960

The Wolf

WEBSTER
HIGH SCHOOL
MINDEN, LOUISIANA

Foreword

With the passing of time, school life will soon die away. We shall never forget school life, the fun we had and the friends we made.

Sometimes the way was dark and progress was slow. Sometimes the stepping stones to our goals seemed to be out of reach and sometimes there were tears and heart-breaks and nothing seemed to be going right. Finally, the goal we had been striving to reach has come in sight.

It is the hope of the 1960 Wolf that as you look back on this high school year, you will recapture the priceless memories of the school year of 1959-60. May the keys in it unlock for each of us the unforgettable memories.

Ruthie L. Jacobs

Hello, here you have before you "The Wolf of 60". In this age of rockets and missiles, we are going to take you on a trip in outer space. Here's hoping that you will enjoy this trip.

Truly, we feel you will place this our "Wolf of 60" among your proudest possessions.

This has been an experience that we shall never forget. We will always treasure this yearbook and will use it to remind us of our beloved Alma Mater. Always we shall remember

"Webster Dear Ole Webster", no matter where we may go. We have enjoyed our stay here at Webster and are looking forward to better things in the future. Webster, we'll always love you.

Yours truly,
Roger L. Banks
Editor in chief

I, the Co-editor of the Wolf of 1959-60, sincerely hope that as you leaf through these pages you will be able to see a view of life at Webster High School. For herein lies the product of hard work and the burning of midnight oil.

In this age of space where men and women, boys and girls are faced with many problems, may this annual bring comfort to your soul. May it stimulate you to search for a higher social order.

Thanks
Abraham Wilson
Co-editor

Dedication

IN MEMORY OF THE LATE MRS. MAURICE MONCRIEF JONES

If we could judge her, she was wise, if that our eyes be true, she was fair and she did prove herself to be true. Therefore, like herself, wise, fair and true, we shall dedicate this book to the memory of a lady whom we held and still hold in our hearts so dear.

She has expressed our hopes and aspirations through her teaching. To the School Board, to our beloved Principal, to the faculty who has also labored tirelessly, to our parents, to the taxpayers whose resources are combined to provide our institution and to the students who are actively engaged in the ever-growing struggle of this institution, we the members of the senior class of 1960 dedicate this edition of the 1960 Wolf in memory of the late Mrs. Maurice Moncrief Jones.

SCHOOL BOARD

CENTRAL OFFICE STAFF

MISS GRACE N. LANDRY
Supervisor of Webster Parish Schools

ADMINISTRATION

Principal's Message

Each year I wait eagerly for the Editor of the "Wolf" to inform me that it is time for me to write my message. This school year has been a challenging one for me, yet when I "count my blessings" I find that it has been a good year. The curriculum has been extended; the physical plant improved; another teacher added, not to mention almost eight hundred of the finest students in the country to work along with a wonderful Staff.

To those who are leaving us in June, may I extend to you our hearty congratulations along with the assurance that we will always be interested in your well being and willing to help you. As you venture out to institutions of higher learning, jobs, marriage, etc. remember Reverend Davis' parable "GOD HAS BEEN GOOD TO US."

SCHOOL LIFE

ENGLISH

English.....Trying to understand and distinguish the difference between those gerunds, participles and infinitives..... Learning to write those troublesome themes and research papers.... developing an appreciation for famous Classics as Macbeth and Julius Caesar... Diagraming those long sentences..... Spelling and learning to conjugate some of the most complicated verbs. Most of all practicing using correct forms of speaking.

By: Gloria Wilson

FRENCH

French..... Starting with the fundamentals of French was helpful but sometimes tiresome..... learning all of those endings of different verb conjugations, writing them..... spelling..... memorizing..... Most of all having them on an examination..... Getting your tongue twisted up and looking embarrassed trying to pronounce Bon jour (good day) or comment-aller-vous (How are you?)..... being able to speak a foreign language helps your own English..... and it helps you to understand foreign people and their customs.

SOCIAL STUDIES

Government.....Studying our Constitutional System.....Facts on our Federal and State Government.....The things that are keeping the wheels of the United States Government spinning everyday.....Reading books behind books about our Government at work.

Stopping and looking back over some of the great men of long ago and what they contributed to our lives.....Learning about the history of the medieval period.....their ways of living.....from first until the last.....Learning the cultural traits of different people.....preparing for tests.....or what will you make after preparing.

INDUSTRIAL ARTS

The Industrial Arts Department at Webster High School, directed by Mr. W. H. Bostick offers great opportunities for boys interested in an Art with a lot of opportunities.

The Industrial Arts Course is offered to students from 9th - 12th grades. A thorough understanding in Mechanical Drawing is required in order to completely accomplish the art of constructing various projects.

Mechanical Drawing is the basis of all phases of Industrial Arts.

Many branches as, leathercraft, woodwork, electricity, ceramics, mechanical drawing are included in this field. Industrial Arts creates skilled craftsmen, creative thinking and stimulates the student greatly in making new products.

SCIENCE

Chemistry --- Finding the valences, finding the atomic number and atomic weight.

All those nasty smells coming from the lab will give you a jar in the ribs. They make you wish for a smell of ammonia.

Gee whiz, don't mention those 104 elements. I'll tell you what, if you learn those 104 elements, you will not have to worry about trying to figure out what an element is. Why? You'll already know them and after you learn them, you'll be walk-

ing around the campus saying such things as hydrogen, oxygen, and helium.

Chemistry is very important. We use it in our everyday life such as mixing gun powder with dynamite and up we go flying through space.

MATH.

Plane Mathematics...with its simple fundamentals of addition, subtraction and multiplication starts the journey up that math ladder.

Algebra is the second step...those plus and minus signs...transposing terms...and most of all those beautiful equations.

Plane geometry third in step... revealing the types of angles... triangles congruent $\triangle ACD \triangle ECB$

Trigonometry...top of the ladder...the relationships between the sides and angles of a triangle $\sin \theta = \frac{1}{c}$

$\theta \dots \cos A = \frac{b}{c} \dots \dots$ logarithms

$\log_3 729 = 6$ solving a problem was hard at times but finally found that... $\log 1750^6 = 16,413,000,000,000$

Gloria Jean Wilson

HOME EC.

When we came to Homemaking we were as eager as when birds are about to fly out of their nest. We were eager to cook and also to sew but we soon learned that there was more to Homemaking than just cooking and sewing. During our four years we learned many things.

In the foods' class just this year, we learned to prepare foreign foods and the different types of spices to use.

In sewing we had a lot of fun learning to read the pattern, buying material and laying out the pattern.

Then we were ready to cut. We can never forget the many seams we had to rip apart. But we always knew we would be proud of our garment when we finished it because we would have an opportunity to model our garments in the Style Show which is an Annual Affair of the Home Economics Department.

Joyce Ann Kennon

PHY. ED.

Physical education is an important activity at our school. One of the purposes of this activity is to develop the body physically.

Such games as tennis, softball, touch-football and others are games that are enjoyed outside. Games such as basketball, volleyball, table tennis, badminton, and dodge ball are in doors.

All of these games serve their purpose while we enjoy playing them. Physical education helps sharpen reflexes and body coordination. It is also an essential key to health and happiness.

BUSINESS

The latest course offering that has been added to the department of Business Education is Bookkeeping. Wait, don't get the wrong idea, it's not just keeping books, there is more to it than that. It can be a lot of fun.

Oh yes, don't forget about shorthand, no more of the long hand around the campus. Everyone is saving time nowadays even in writing. Why use the long way of doing things when there is a short cut.

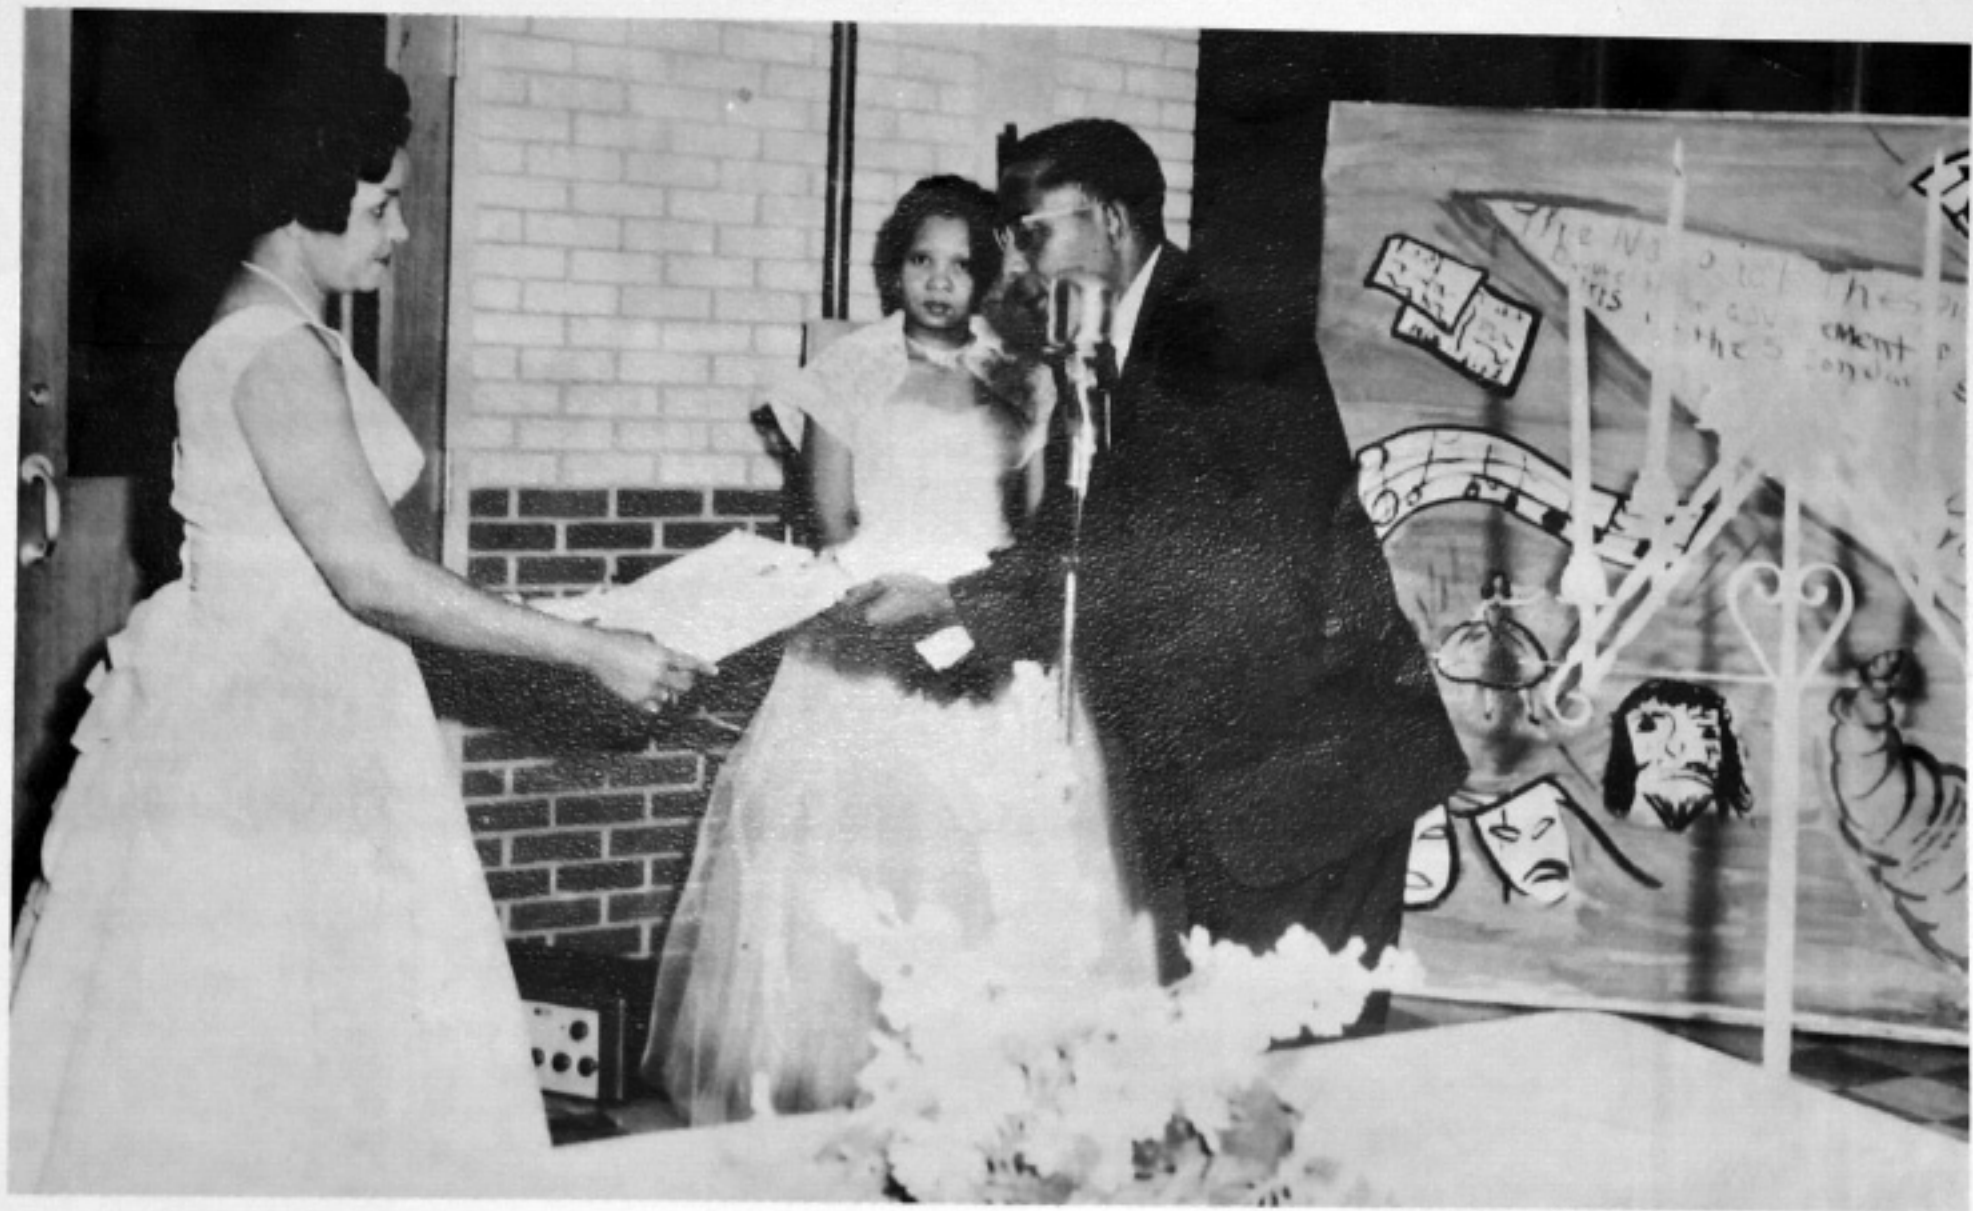

Typing is also a short cut if you can type. Typing has been a lot of fun. Oh yes, pecking for some has been fun around Webster. If you can't type, it is fun to know that you can peck.

Some are thinking of going into small businesses. With all of the information they have gained from General Business, there should be no doubt about their becoming successful business men and women.

Business Education is really doing something for students at Webster High School.

THE
BUSIEST
BOY

AT
SCHOOL...
ABRAHAM WILSON

TIME ON YOUR HANDS

Abraham Wilson makes a business out of everything he does. He is never idle. Time is valuable to him. Do you have plenty of time on your hands to do nothing?

Summer is coming. Your time is your own. Hot weather and relaxing are poor excuses for any one to be careless, and idle. What will you do with your time? Be bored and lonely with nothing to do or make it add up to something?

Golden moments lost can never be gained. "Abe" seems to realize this to the extent, he is busy from morning until night. Cafeteria job, trainer, studies, engages in part-time jobs on Saturdays; major and minor activities of the school.

"My time is valuable and expensive," says Abraham Wilson.

...y and "Joe"
